

Muundo Inspired by nature

Muundo creates tables inspired by the tactility of textures we encounter in our surroundings.

Every environment is characterised by its typical texturized elements. This uniqueness can be found through the handcrafted collection.

Now, there are five collections: Maana, Usoo, Laini, Haaki and Zuri, each has dining and coffee tables.

The beauty of nature is reflected in each piece through the soft and organic forms.

This collection is designed by Cas Moor and Stefano Prevosti.

Cas is a Belgian designer with a bachelor's and masters degree in Interior Architecture and Autonomous design. A good design for Cas is when an object is stripped down to its bare bones with the essence still intact. His pieces are both functional and aesthetically pleasing, making them a staple in contemporary homes.

Stefano is an Italian designer who graduated in Industrial Design at the Design school in Denmark. In 2017 Stefano exhibited at Milan Design Week and won the FSC Design Award in Copenhagen. He is known for his innovative use of materials, combining traditional techniques with modern technology.

While designing the collection, Cas and Stefano were inspired by the different natural phenomena that appear in our environment. A fascinating example are the different shapes wild mushrooms can take and how they are all soft and elegant in their appearance. We knew these shapes would be ideal to translate into a table collection.

Based on this inspiration, the Muundo collection has curved and round details with an imperfect surface finish as a tribute to nature.

The collection is crafted from a composition of minerals, lime and mortar. Every table is handcrafted which makes each piece unique. The material is used for those who wish to combine technicality, originality, personality and aesthetics.

Used both for its technical qualities and its decorative advantages, it offers interior and exterior architectural projects a mineral appearance. Thanks to its thinness and impermeability, our material adapts to all shapes and surfaces, offering an incomparable look to your furniture. The material is waterproof, sustainable and heat resistant.

The coating is manufactured in Belgium and is composed of 95% natural ingredients sourced in Europe.
