

# Outdoor cover

---

## TECHNICAL SPECIFICATIONS

Material	180 g/m <sup>2</sup> polyester, PU-coated
Water Resistance	2000 mm hydrostatic head
UV Resistant	Yes
Breathable Fabric	Yes
Seams	Double-stitched with piping
Fastening System	Adjustable elastic

## CARE & MAINTENANCE

We recommend to **place a flowerpot or similar object in the middle of the table** under the cover to create height. This prevents the cover from touching the tabletop directly, allowing air circulation and **avoiding moisture from being trapped**, which could damage the table. Clean the cover with lukewarm water and a **soft sponge or cloth**, using a mild detergent if needed. **Do not machine wash or tumble dry**. Always allow the cover to dry completely before folding and storing.

## WARRANTY & DISCLAIMER

The protective cover is backed by a two-year warranty against **manufacturing defects in fabric and stitching**. This warranty does not cover natural wear and tear, extreme UV fading, or stains caused by trapped moisture. To ensure optimal performance and protect your furniture, we recommend always making sure that the table and cushions are completely dry before applying the cover.
